(a) Estimated number of wage or salary earners in employment excluding employees absent in the defence forces, at home or abroad. The first column includes part-time relief workers in actual employment or number equivalent thereto, but relief workers are excluded from the subsequent columns. (b) Excluding working proprietors. (c) Until June, 1941, based on a sample of employment in certain retail stores at 15th of each month. From July, 1941, it is based on the number of employees on the last pay-roll of each month of those retail storekeepers who pay Pay-roll tax. (d) All building operations excluding Government buildings. See footnote on p. 21. (e) Final totals to March, 1942. Monthly totals since April, 1942, are partly estimated and subject to slight revision. See p. 28. (f) June, 1933. (g) Average for year. (h) July, 1939. (i) Not available. (j) Preliminary estimates. (k) Not yet available. (l) Including Government employees—262,000 males and 46,000 females in June, 1933 350,000 males and 55,000 females in July, 1939; for later months see p. 3. (m) Revised.

(a) Estimated number of wage and salary earners in employment defined as " persons occupied as wage and salary earners " as distinct from " equivalent of full-time employment ". Employees absent in the defence forces, at home or abroad, and Government " relief " workers are excluded. Estimates have been revised since last issue.

(b) The numbers here shown are the total employees on the last pay-roll of each month shown on returns of employers who are taxable. Employees of State, semi-Government, and Local Government authorities are included under " All Employers Furnishing Returns ", and in the appropriate industry column when separate returns are supplied, e.g., Railway Commissioners in four of the States. These industry totals are useful only as indicating trend. Figures have been revised since last issue, by addition of final Pay-roll Tax Returns for year ended 30th June, 1942.

# EMPLOYMENT IN FACTORIES.

(Number of Employees in Thousands excluding Working Proprietors.)

## TRADE UNION UNEMPLOYMENT RETURNS.

The only regular records of unemployment available in comparable form over a considerable period are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 54 per cent. of the total trade union membership and between 20 and 25 per cent. of all wage and salary earners. For some States the returns are a more representative sample than for others. This table, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of trend of unemployment as reported by secretaries of trade unions.

(a) Coal-mining employees out of work owing to an industrial dispute were excluded from the tabulation, but persons in other industries indirectly unemployed owing to the dispute were included.

### INDUSTRIAL GROUPS: CHANGE FROM FEBRUARY, 1942, TO MAY, 1942.

Manufacturing—I. Wood, furniture, &c., 1.0% to 1.1%; II. Engineering, metal works, &c., nil; III. Food, drink, tobacco, &c., 3.5% to 3.8%; IV. Clothing, hats, boots, &c., nil; V. Books, printing, &c., nil; VI. Other Manufacturing, 2.2% to 1.4%; VII. Building, nil; VIII. Mining, quarrying, &c., 4.0% to 4.4%; X. Land Transport, other than railway and tramway services, 2.2% to 2.6%; IX., XI., XII.. XIII. and XIV. Other and Miscellaneous, 1.7% to 1.4%; All Groups, 1.8% to 1.7%.

## BALANCE OF OVERSEA TRADE.

In the following table the oversea trade of Australia in physical commodities has been set out in a form which distinguishes between the ordinary trade in commodities other than gold, those movements of gold which may be regarded as resulting from current Australian production, and those movements of gold which cannot be attributed to the fact that Australia is a gold-producing country. The balance of trade on "current" account (that is, including credits from gold produced rather than gold exported) is given in columns D and E. The total balance of trade, as officially recorded, is given by the total of columns D and F.

Out of the credits mentioned above, together with those accruing from other "invisible" sources and existing balances of "oversea funds", Australia has to provide for various recurrent charges incurred overseas, and some payments of a capital nature. Chief among the former are the oversea interest commitments of the Australian Governments and other public bodies, which for recent trade years are estimated at approximately £22,000,000 sterling. Since the outbreak of war in September, 1939, there have been increasing amounts of special debits and credits in oversea payments on Government account and on account of ocean freights, &c. These substantially affect "balances of payments" and of "oversea funds", but particulars of them are not available for publication.

(a) Not available for publication. (b) Subject to revision. (c) Later trade figures are not available for publication; for gold production see p. 24.

NOTE.—The export figures relate only to merchandise actually shipped. Under contracts with the British Government, Australia receives payment for some exportable commodities, e.g., wool, irrespective of when the goods are shipped. Current payments for exportable goods will be somewhat larger than the recorded value of exports and payments relating to the balance of trade will be more favorable than is indicated by the figures above.

(a) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally. (b) Revised from December, 1940.

NOTE.—The above index-numbers correspond to those published elsewhere in this review but have been recalculated on the base of the average of the three years preceding the war. For this reason they cannot be compared directly with index-numbers on other pages.

## EXPORT PRICE INDEX.

These index-numbers are compiled from the prices of 20 commodities which constitute about 85 per cent. of all exports. The prices are multiplied by the average quantities exported during a fairly recent and representative period.

(Base : 1928-29 = 1,000.)

## EXPORT PRICE INDEX (CHANGING BASE).

The index-numbers in the table above, while they indicate satisfactorily the general trend of the market, take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers (inclusive of gold) in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

(Base : Weighted Average Price Level in corresponding months of preceding year = 1,000.)

Month.	1940-41.		1941-42.		1942-43.

# PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base 1928-29 = 1,000 from the revised series published in *Production Bulletin* No. 34, Part II. They are based in general on prices realized in the principal markets of Australia.

The monthly index-numbers (based on the nearest equivalent wholesale quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and to provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

# WHOLESALE PRICE INDEX.

## BASIC MATERIALS AND FOODSTUFFS.

The construction of this new index has been made possible by the collection of new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of General Wholesale Prices. The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base : 1928-29 = 1,000.)

Period.	Metals and Coal.	Oils, Fats and Waxes.	Textiles.	Chemicals.	Rubber and Hides.	Building Materials.	Foodstuffs and Tobacco. (b)	Goods principally Imported. (a) (b)	Goods principally Home Produced.	All Groups. (b)

August .. ..	1,162	837	952	676	959	904	1,002

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £ of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recomputed from original base, par values.

# SECURITY PRICE INDEXES—continued.

August	1,002	1,059	481	1,304	980	709	848

(a) See note (a) on page 19. These 34 shares relate to leading companies and do not include bank shares nor mining shares. (b) Compiled by the Stock Exchange of Melbourne. The index-numbers of bank shares and silverlead shares represent averages (weighted by paid-up capital, with adjustment in the case of bank shares) of the mean monthly prices on the Melbourne Stock Exchange. The preference share index-numbers are based on the reciprocals of average yields. Recomputed from original base, May, 1926. (c) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. End-of-month values were used until December, 1930, and mean monthly values thereafter. Recomputed from original base, April, 1928.

(a) Partly estimated in respect of the City of Sydney.

NOTE.—The National Security (Building Control) Regulations, which operated on 5th December, 1940, placed the granting of building permits for new buildings or alterations costing more than £5,000 under the control of the Commonwealth Treasurer. Various amending regulations made the control more stringent. On 19th June, 1942, the control passed to the Department for War Organization of Industry, after which date only alterations costing less than £25 can be made without consent.

The "value of permits" shown above relates to the value of building permits issued by local government authorities and not to approvals granted under the Regulations.

The values shown exclude, in general, air raid shelters and alterations for protection against air raids.

## NOTES.

A. This column is the total of all series available continuously since 1928-29 for which information is at present collected at least quarterly. Columns G above and J on the next page are omitted as the information is not available for the earlier years, and column L on the next page is omitted because quarterly figures are not available.

F. Includes the Cities of Geelong West, Mildura and Warrnambool and the Towns of Horsham, Newtown and Chilwell, and Sale.

G. Includes the Cities of Ballarat, Bendigo and Geelong, and Shepparton Borough.

NOTE.—See footnote on p. 21. The values shown exclude, in general, air raid shelters and alterations for protection against air raids.

					(a)—1,134

(a) Figures not comparable with other months owing to the inclusion in some States of certain annual and other commitments in the expenditure figures for June. (b) Excluding Uniform Gauge Railway. (c) Excluding uniform Gauge Railway January to June, 1942.

NOTE.—Minus sign (—) indicates loss.

# MAINLAND RAILWAYS: FREIGHT TONNAGES CARRIED.

The following table shows statistics of freight tonnages carried by the Mainland State and Commonwealth Railways.

The daily averages for freight tonnages are obtained by dividing monthly tonnages by the number of days in the month, excluding Sundays, Christmas Day and Good Friday.

Freight totals are obtained by adding together the total freight tonnages carried on the Commonwealth and State Railways and deducting the sum of the interstate tonnages carried in New South Wales and South Australia. This avoids double-counting except to a negligible extent.

Period.	Net Tonnage Carried—Mainland State and Commonwealth Railways.									
	Total Tonnage Carried.		Coal and Coke.	Other Minerals.	Wheat.	Other Grain and Flour.	Wool.	Live Stock.	Fruit.	All Other.
	Index 1928-29 = 100.	Tons.

# WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. The returns do not relate to all wholesale trade, nor do they necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degree by such changes. Insufficient information is available to enable adjustments to be made to the crude figures on this account, but endeavour is being made to obtain data that will enable approximate adjustments to be made. Monthly totals are compiled on a basis comparable with the monthly averages for preceding years.

An index of activity in New South Wales is afforded by monthly returns of the sales of 42 large factories.

Monthly Averages.	Australia.			New South Wales. Value of Sales of 42 large factories.

July .. .. ..		(c)	(c)	5,410	

(a) The Act came into operation on 18th August, 1930, the rate of tax being  $2\frac{1}{2}$  per cent. It was raised to 6 per cent. on 11th July, 1931, but was reduced to 5 per cent. on 26th October, 1933, and to 4 per cent. on 11th September, 1936. It was again raised to 5 per cent. on 22nd September, 1938, to 6 per cent. on 9th September, 1939, and to  $8\frac{1}{2}$  per cent. on 3rd May, 1940. On 22nd November, 1940, rates of 5, 10 and 15 per cent. on different classes of goods were introduced, and on 30th October, 1941, the last rate was raised to 20 per cent. On 1st May, 1942, rates of  $12\frac{1}{2}$  and 25 per cent. were substituted for those previously in existence. With certain specified exemptions, all goods sold in Australia, including imports, are taxable. The list of exemptions was extended as from 11th July, 1931; 2nd September, 1932; 11th November, 1932; 27th October, 1933; 1st August, 1934; 13th December, 1934; 25th October, 1935; and 26th September, 1936. The list of taxable goods was extended as from 3rd June, 1940, and 22nd November, 1940.

(b) Net sales under Sales Tax Acts subject to revision. (c) Not yet available.

## RETAIL TRADE.

Statistics of retail sales are collected in three States but are available for publication in only two, namely, New South Wales and Queensland. In New South Wales the Retail Traders Association Research Bureau, in co-operation with the Commonwealth Bank, collects returns from a number of large Sydney stores. In Queensland returns are collected by the Bureau of Industry from twelve large department stores in Brisbane and their branches in country towns. Because of the relatively rapid development of chain store business, it is uncertain to what extent the department store figures are representative of all retail trade.

(a) Including Inscribed Deposit Stock of E.S. and A. and Queensland National Banks. (b) Including Short-term Loans, other than Treasury Bills of the Commonwealth Bank. (c) In computing the ratios the figures relating to the Rural Bank of New South Wales have been excluded.

# BANK CLEARINGS.

In the absence of statistics of debits to customers' accounts, bank clearings form a useful index of the money-value of cheque payments. Since they do not include cheques deposited in the banks on which they are drawn, the figures are not exhaustive, and their comparability is sometimes impaired by the effects of banking amalgamations. Cheque clearings connected with the redemption or issue of Treasury Bills have been excluded from the following table, but adjustments have not been made for other sporadic transactions concerned with public finance.
